SITUATION SUMMARY

Riverside County- Coachella Music and Arts Festival Saturday and Sunday, Indio

- This is the second weekend of the annual music and arts event held at the Empire Polo Club.
- Estimated weekend attendance is 80,000

Los Coyotes Indian Reservation, San Diego County

As a result of rains and flash flooding on the Los Coyotes Indian Reservation in San Diego County, Mission #2016-Southern-22320 was approved to address the community life safety needs, road repair, and other critical concerns in conjunction with FEMA, Bureau of Indian Affairs (BIA), Cal OES Southern Region, Cal OES Tribal Advisor, Caltrans Region XI, San Diego County OES, and Los Coyotes Tribal personnel.

- Caltrans installed five (8'x12') steel plates along with safety signage to provide temporary road stability and improved access over the Los Coyotes Reservation's only life line road. Delivered and installed on Saturday 4.16.16.
- The road is currently stable with one lane closed
- Stakeholders will continue to monitor the situation to provide long term solutions.
- Per the Cal OES Southern Duty Officer (SDO), due to miscommunication between BIA and Tribal personnel, BIA will conduct another site visit on 04/25/16.
- The Tribe has applied for a US Army Corps of Engineers (USACE) funding waiver for repairs. USACE assessed the road and is awaiting BIA assessment
- All further action is on hold pending the BIA assessment.
- National Weather Service is providing the Tribe with daily spot forecast data. There is currently a potential for precipitation on 04/25/16 which may cause additional road damage
- Emergency preparations in place, including food and generators staged with the Viejas and San Manuel Tribes offering assistance (no monetary contributions)
- The Cal OES Southern Region Tribal Point of Contact, Territory Representative, and SDO continue to monitor the incident.

SITUATION SUMMARY

Weather of Concern

Northern California

- For Northwest portions of the State, patchy frost can be expected early in the week across many interior valleys, particularly Monday and Tuesday mornings when some of the coldest protected valleys may see a light freeze.
- Another trough from the Eastern Pacific will move into the Pacific Northwest Sunday and dig southward into California bringing another wave of rain and snow showers to our region and cooler temps.
- Showers will continue into Monday but should primarily be over the western Sierra slopes and eastern side of the Sacramento Valley.
- Rain and snow amounts are not expected to be much with this system. Valley and foothill rain up to a quarter of an inch with mountain snow up to 3 inches above 5000 feet is possible.

Southern California

- A trough of low pressure moving inland through the Great Basin will produce strong winds in the mountains and deserts Sunday night through Monday, with possibly a few light showers over and west of the mountains. Another trough could bring periods of light to moderate showers to Southern California mainly on Thursday.
- Sudden gusty cross winds will create dangerous driving conditions on some area roadways, including Highway 101 along the South Coast, Highways 154 and 192 in Santa Barbara County, the I-5 Corridor, Highways 14, 138, 2, and 39 in Los Angeles County and Highway 33 in Ventura County.
- A series of pacific fronts will bring strong winds and rough seas to the Southern California waters through early next week. The strongest winds will be most likely Monday through Tuesday, when gusts of 25 to 35 knots will be likely at times (30 to 40 mph). Seas and surf will also build during this period, and will be steep and rough at times. Another storm system could bring hazardous conditions once again by late next week.

County of Madera

- On 4/22/2016, at approximately 1430 hours, the County of Madera activated with one person to monitor weather and impacts from a fast-moving storm that caused several trees to fall in the City of Madera.
- No state assistance was needed.
- Madera County went back to duty officer status at 1830 hours on 04/22/16.

WEATHER

WEATHER SYNOPSIS BY REGION:

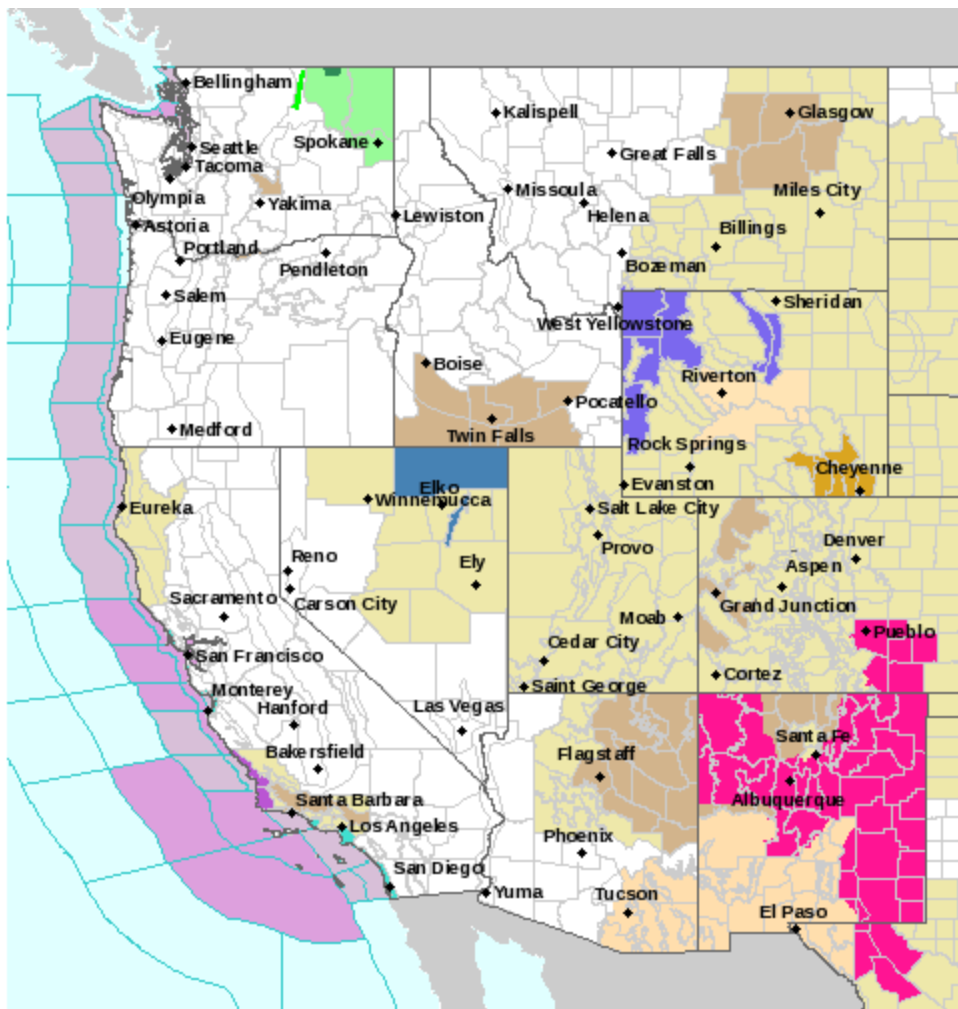

NORTHERN CALIFORNIA

Weak ridging today as a trough moves into the Pacific Northwest. Some isolated showers may occur this afternoon over the mountains. The trough over the Pacific Northwest will deepen over the region tonight and Sunday and may bring some showers to the mountains. The models show good instability tomorrow afternoon and evening but there may not be much available moisture to trigger anything. Will continue to watch the trends for the moment. The center of the trough will be over Central Nevada on Monday and may bring some wrap around moisture and showers to the Sierra Nevada. Snow levels look to be around 7000 feet during the day. Most other areas should remain dry, cool with breezy to locally windy north winds for the valley. Tuesday will be dry and warmer as a ridge builds over the area.

SOUTHERN CALIFORNIA:

High pressure aloft will build in over the weekend. There will be periods of gusty to locally strong winds for portions of Southern California as well as a slight warmup. There will be a series of upper level disturbances that will move through the region next week. The best chance of precipitation will be next Wednesday and Thursday with near normal high temperatures.
